Technology Solutions
To the World.**

Our mission

We work with the most up to date Tech Stacks to build scalable software. We understand the client's specific needs to prepare software that can adapt to clients future growth & needs.

Core Values and Competencies

Medina Tech Limited is a dynamic software company headquartered in Dhaka, Bangladesh. Our core specialization lies in the creation of innovative Machine Learning-powered SaaS solutions that redefine industry standards. At Medina Tech, we pride ourselves on our commitment to utilizing state-of-the-art technology stacks. This commitment enables us to not only deliver impressive efficiency savings to our clients but also to remain at the forefront of emerging information systems and global technological progress. With an unwavering dedication to excellence, we continuously strive to shape the future of software technology.

Guided by our values, we prioritize UI/UX, Accessibility, Security, and proactive Customer Support. With a skilled and diverse team, Medina Tech excels in creating custom software solutions, spanning Mobile & Web Apps, LMS, CRM, ERP, Marketplaces, and Games.

Class Connctet

ClassConnect, developed in-house by MedinaTech, is your all-in-one Learning Management System (LMS) based on Moodle's technology stack. Designed for schools, colleges, and universities, it seamlessly integrates learning, administration, management, and financial tools, making education more efficient and effective. Streamline your institution's operations and provide a superior learning experience with ClassConnect.

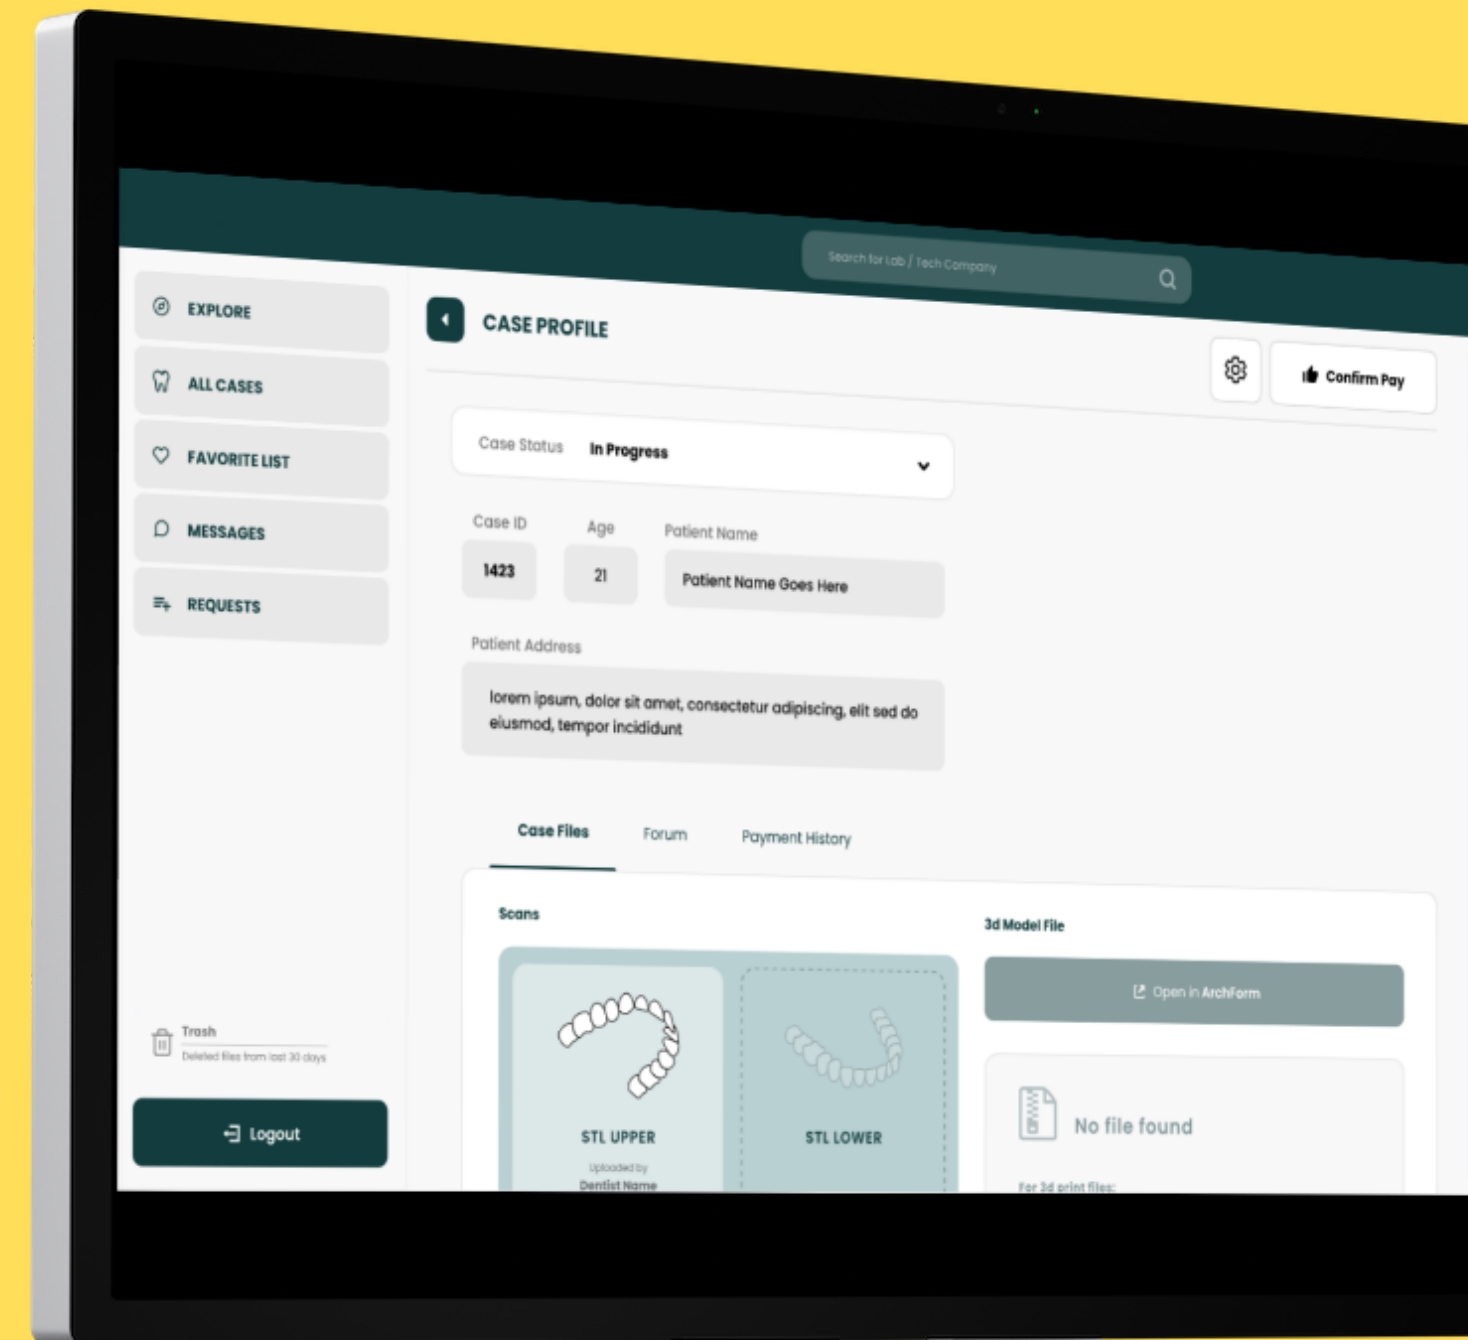

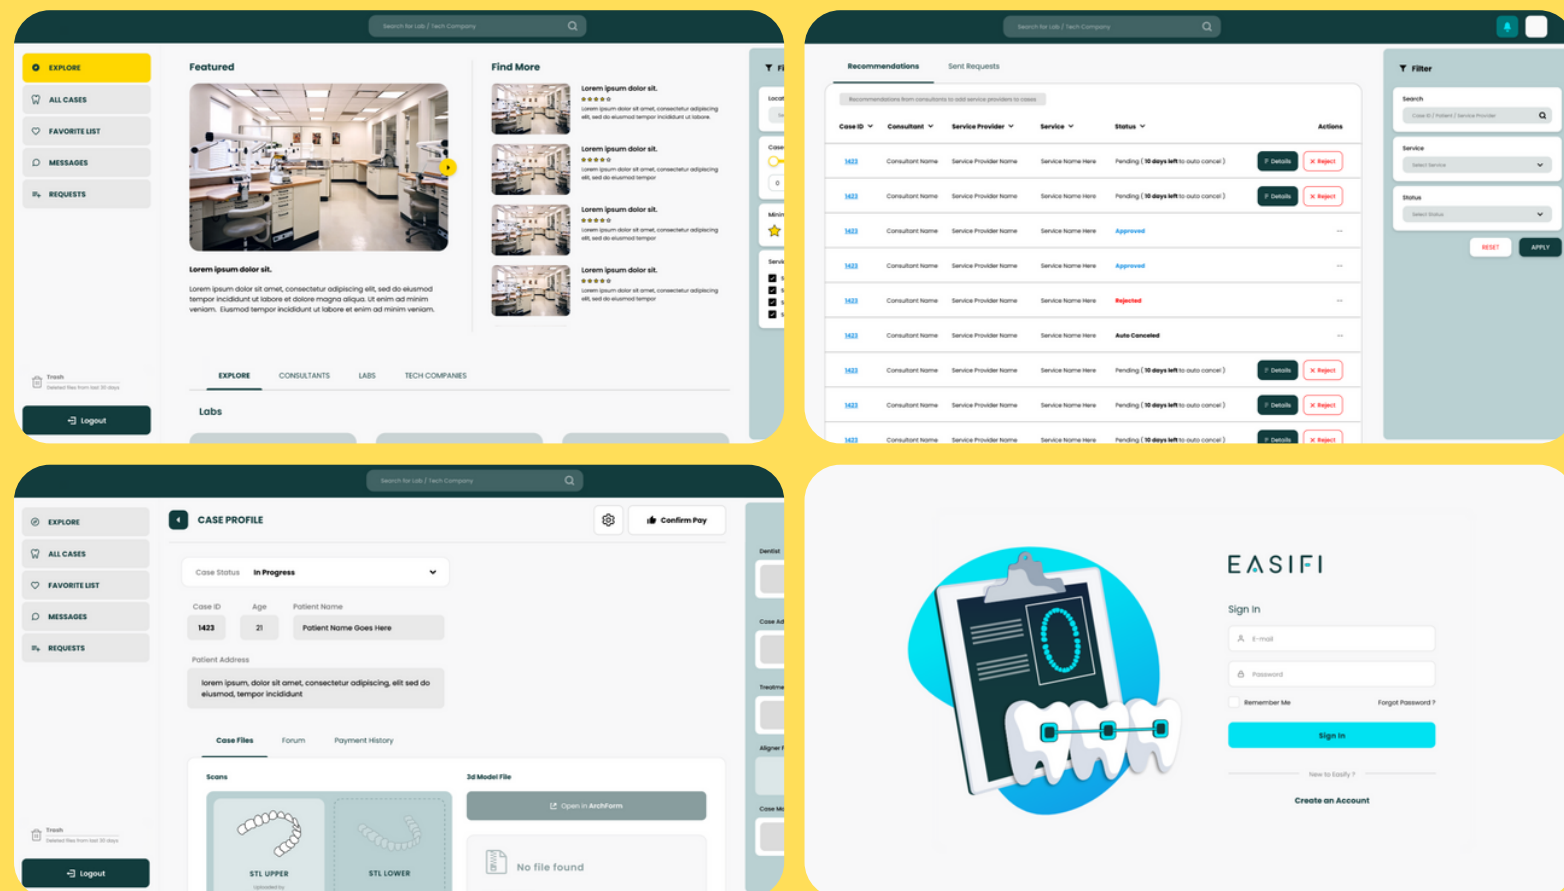

Analytics-driven / User-friendly / Cloud-based / AI-powered / Scalable

MTL MVM

MVM is a state-of-the-art multi-vendor marketplace, initially tailored for the Dental Clear Aligner industry in the US, but versatile enough to serve any industry requiring multiple vendors to complete projects. Built with the latest and greatest technologies, MVM empowers vendors to bid on different facets of a project, fostering healthy competition and unmatched efficiency. With infinite scalability, MVM adapts to your ambitions, making vendor collaboration easier and more effective than ever. Welcome to the future of project collaboration with MVM.

Multi-Vendor / Marketplace / Secure / Cloud Based

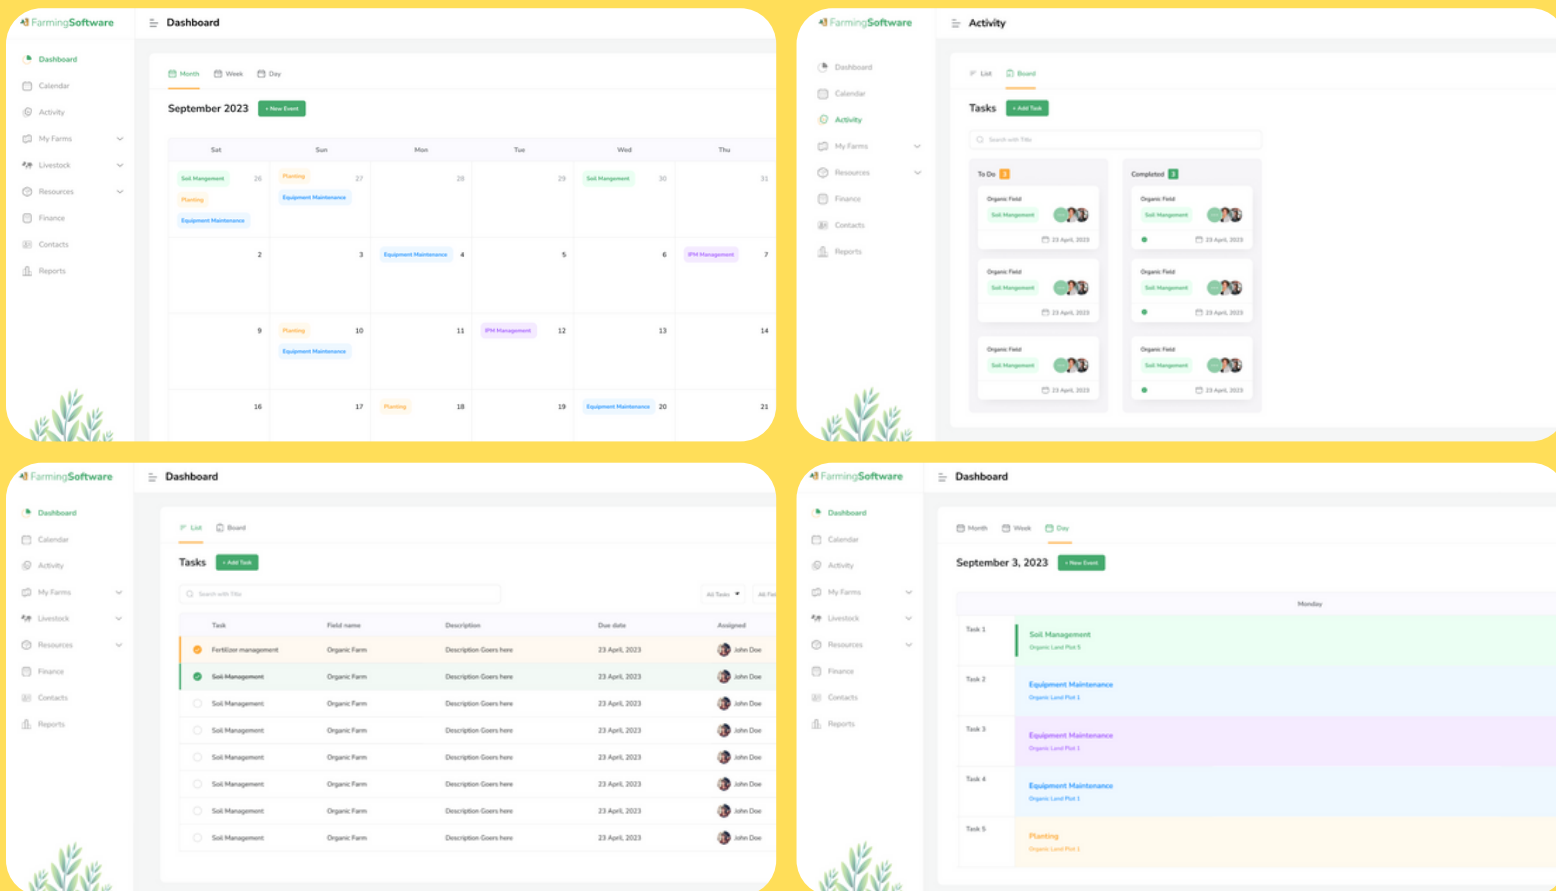

Chashi FMS

A farming management solution powered by AI, overseeing every aspect from seed to harvest. Dr. Chashi's groundbreaking disease and pest detection forms its foundation, while advanced AI drives cost reduction and increased production.

This versatile and infinitely scalable system is your ultimate partner for optimizing farm operations, ensuring bountiful yields, and ushering in the future of precision agriculture.

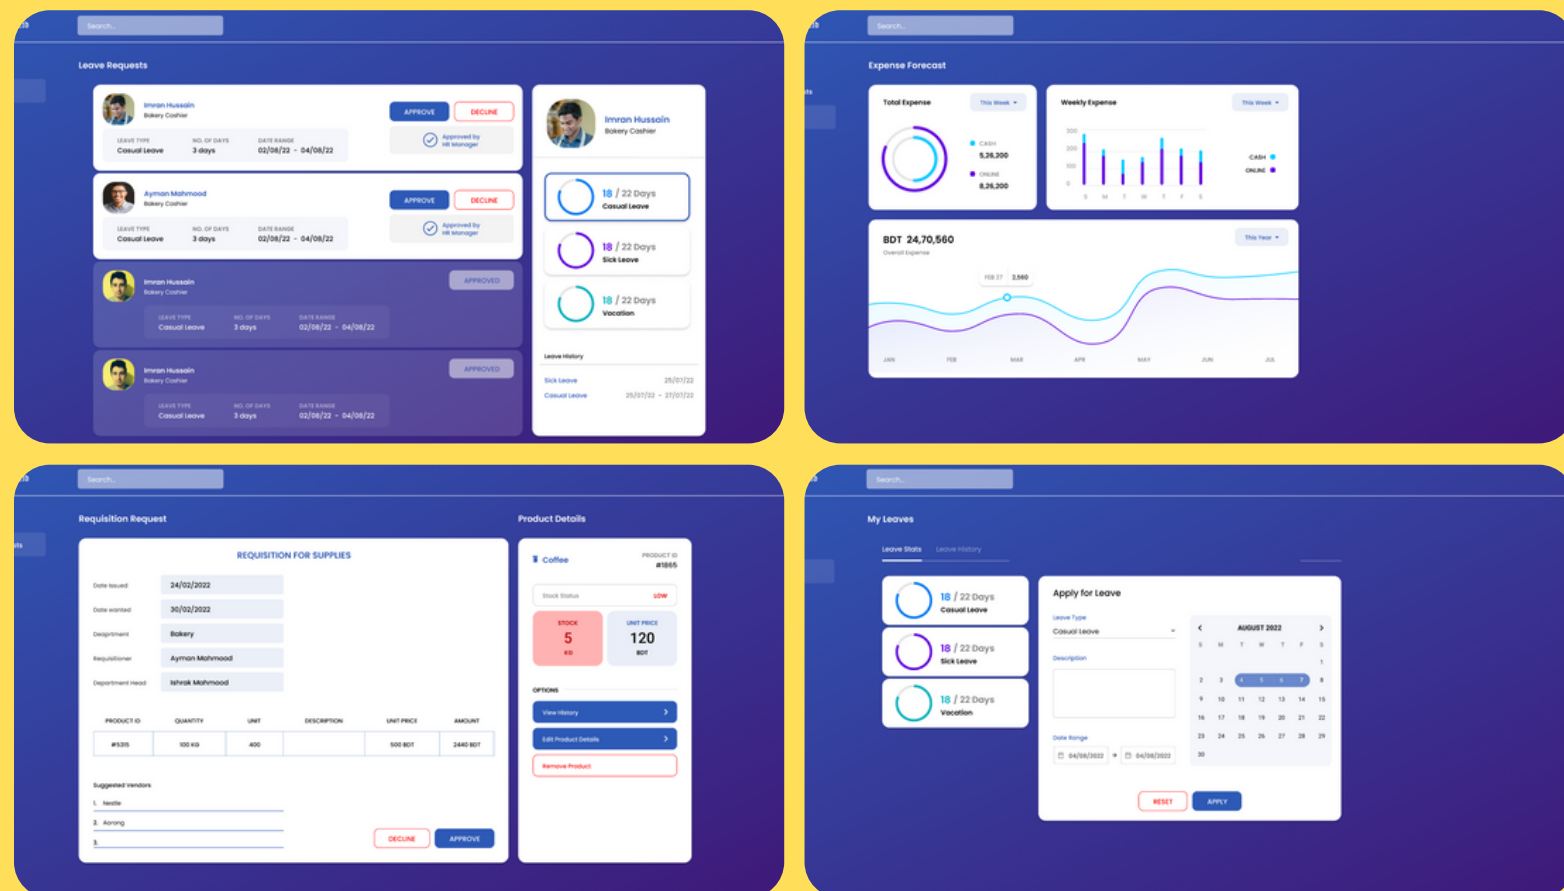

Data-driven / AI- Powered / Timesaver / IPM / Healthy

MTL ERP

MTL-ERP is a comprehensive Enterprise Resource Planning (ERP) solution meticulously crafted to encompass a wide array of ERP features, from financial management and inventory control to human resources, supply chain management, and customer relationship management. It's easy to deploy and effortless to manage. Experience the future of ERP with MTL-ERP and unlock new possibilities for seamless business management.

Training

On-the-Job Training (OJT)

Our OJT programs provide hands-on learning experiences directly within the workplace environment.

Participants receive practical training while performing their daily tasks, enabling them to apply newfound skills immediately.

Master Trainer (MT) Training

Our MT training programs empower selected individuals to become expert trainers within their organizations. Participants learn advanced training methodologies, instructional techniques, and effective communication skills to lead training sessions confidently.

User Training

Our user training sessions are tailored to ensure end-users have a comprehensive understanding of our technology solutions. Participants receive step-by-step guidance on using the products, maximizing efficiency, and troubleshooting common issues.

Security & Compliance

At MedinaTech, we prioritize the security and compliance of our systems and operations to ensure the confidentiality, integrity, and availability of data and services.

Data Encryption

All sensitive data is encrypted during transmission and storage to prevent unauthorized access.

Access Controls

Role-based access controls are implemented to restrict access to sensitive information based on user roles and permissions.

Firewall Protection

Robust firewall systems are deployed to monitor and control incoming and outgoing network traffic, protecting against unauthorized access and cyber threats.

Regular Audits and Assessments

Routine security audits and assessments are conducted to identify vulnerabilities and ensure compliance with industry standards and regulations.

Clients

Drive Arabia

Dubai, UAE

We have been managing their platform for years. A complex yet sophisticated platform that hosts millions of users. We also manage the data generated from this large platform. Since the start of the project, over time we've added many features to the platform including an aggregator.

Genetica

Dhaka, Bangladesh

We have developed Dr. Genetica App, which aims to recognize the crops and diseases and recommend products (insecticides, fungicides, and so on) along with the correct dosage based on the crop and disease. We have been providing AI-based Crop Disease detection solutions for a few years to Genetica.

Intraco

Dhaka, Bangladesh

We have provided a range of management systems, including Human Resource Management, Inventory Management, LPG Sales Management, Fleet Management, Hotel Management, and Hotel Portfolio Website to create a comprehensive and efficient solution that automates and streamlines various management processes based on their needs.

Younivers

Berlin, Germany

Younivers is an innovative mental health app that prioritizes prevention and resilience by enhancing mental health literacy. This app incorporates a conversational AI bot and an immersive learning environment, providing distinct early intervention resources. We are continuously adding features based on client requirements to meet the needs of our customers.

Clients

WeLink

Dhaka, Bangladesh

WeLink Ventures Limited is an HR consultancy firm that offers Managed HR services and digital solutions for Payroll management. We have efficiently developed a solution that caters to all their requirements, needs, and relevant business strategies.

Thyrocare

Dhaka, Bangladesh

Thyrocare Bangladesh limited is the first automated laboratory operating out of a single centralized setup. We have automated their manual work process based on their existing workflow. Through our automated services, they are serving millions of people in Bangladesh.

Virginia Tech

Blacksburg, USA

IPM App for Virginia Tech is an Artificial Intelligence-based app for agriculture in Bangladesh. The main objective of this solution is to extend critical mass with crop-specific IPM packages through digital platforms.

Easifi

New York, USA

Easifi is committed to empowering dental professionals with technology to streamline the process of delivering esthetic and healthy smiles. This platform has been developed to equip dental professionals with modern technology to provide the best care possible for their patients.

Join us in revolutionizing software development with the use of emerging technologies.
